THANK YOU
FOR REQUESTING MORE INFORMATION
ATV Tracks offers free shipping to the lower 48 states, except California. Most track orders are processed and shipped within two business days after order confirmation. To keep costs low, we drop ship as much as possible. This means most of our track systems are shipped from Quebec City, Canada. Shipping normally takes 5 to 10 business days to Eastern and Central states. Western states and remote areas outside of normal trucking routes can take 7 to 11 business days, depending on destination. Please note that Alaska and California will have shipping charges. Also, we do stock some tracks at our showroom in the Northwest. We can rush ship from our showroom, but this may incur additional costs since we would be shipping twice.

Track systems must be shipped to a business address. Since we drop ship our track systems from Canada, shipping to a business address means there are no customs or tariff fees. This also allows us to sell our products without sales tax outside of Washington state (excluding Alaska and California). Your products can be delivered to your place of business, your place of employment, or any other business that will allow you to meet with the delivery truck. Customers will be notified by email and phone of the shipment and tracking information, which will allow customers to contact the delivery service to coordinate pickup. It is recommended to bring assistance with loading and unloading of your order. Delivery drivers normally are not allowed to assist with loading of orders.

ATV Tracks does accept returns with a 20% restocking fee. As always, please call us at (866) 243-8359 with any questions.
